PRODUCTION HOUSE

**CLIMATE
NEUTRALITY**

AT **DIEL**

Skiing is more than just a winter sport or vacation pastime, it's a beautiful way to connect with nature. Protecting the environment is thinking about how your actions can affect the world around you and avoiding negative, destructive influences.

DIEL's top priority is to reduce the negative impact on our planet, offering sustainable and ethical solutions and creating products with low environmental footprint.

Our key goal is to be climate-neutral by 2030. We will achieve this through low-emission technology, the consumption of CO2-neutral electricity and gas, conscious resource management and in addition, by investing in various climate protection projects.

We also believe that a high-quality product with a long lifespan is one of the best measures to make a product more environmentally friendly. That's why DIEL'S clothes are designed to last.

DIEL's production facility relies fully on renewable solar power to cover our manufacturing needs which additionally combat climate change and carbon emissions.

HOW TO KNOW YOUR SIZE?

Here's what you're going to need:  a book  a flexible tape measure  a friend

A few tips before you start:

- Take everything out of your pockets and remove your watch, belt and shoes.
- Wear a tight-fitting top without a hood.

A: HEIGHT

Stand barefoot, with your body touching the wall. Place a book on top of your head and measure the distance from it to the floor.

B: CHEST

With your arms relaxed at your sides, measure around your chest at the widest point. It is important for the tape measure to be level front to back.

C: WAIST

Find the natural curve in your side and measure around the smallest part of your waist.

D: HIPP

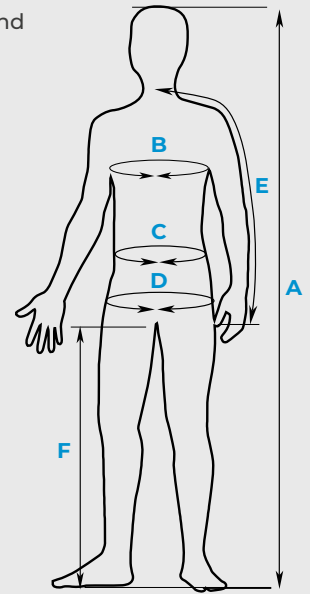

Find the prominent bone in the front of your hip. Measure around the body at its level.

E: NECK TO FINGERS

Find the midpoint of your neck. To do this look down and curve your neck. Feel for the prominent vertebrae right in the middle - this is your C7. Measure the distance from the C7, through the shoulder and elbow until you reach the knuckle of your middle finger. Keep your elbow bent at a 45 degree angle.

F: INSEAM

An inseam is the length between your crotch down to your ankle bone. Essentially, it's the distance of your inner leg.

YOU ARE READY!

Use the charts to determine your size:

If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit. If your measurements for chest (B), waist (C) and hips (D) correspond to different suggested sizes, order the larger size.

Just send us your measurements, and we will be more than happy to create the right uniform for you.
